Subject: Clean up the Willamette

Dear Administrator Gina McCarthy,

I understand that the government has to prioritize its spend across many worthy causes. So does the EPA with its funds. I do, however, that we do not enough to protect our environment. Every generation has its moral blind sides that only with hindsight become obvious. [Take the example of slavery or colonial war]. I believe trading off environmental health vs economic growth maybe our generations worst shortcoming. Especially, Cities - where more and more of our population lives - need to be healthy. I worry that the current proposal of the Willamette clean up falls short of what we should do. Please, reconsider.

Sincerely,

(b) (6)

Portland, OR 97239
